Subject: Good News - No Negative comments on South Fork

Scott,

We received no negative comments on South Fork. Thanks.

From our weekly notes:

On Dec 6, the public comment period ended on the revised draft outer continental shelf (OCS) air permit for the South Fork Windfarm. On Oct 20, R1 reopened the public comment period for an additional 47 days to request comment on a revision to the draft permit that removes the requirement to obtain emission offsets for construction emissions. R1 did not receive any verbal comments during the virtual public hearing on Dec 2. R1 received three sets of comments during the second public comment period that were generally supportive of the revised permit. R1 intends to issue a final permit in Jan 2021.
